

Geographic Differentiation In The Australasian Great Crested Grebe (*Podiceps Cristatus Australis*)

by Bruce Cameron Robertson; Neil J Gemmell; New Zealand

Grebes (Aves: Podicipedidae) are a threatened family containing species that vary widely in demography. The most speciose genus, *Podiceps*, particularly the eared grebe lineage, best reflects this curious demography. Geographic differentiation in the Australasian Great Crested Grebe (*Podiceps cristatus australis*). Systematics and taxonomy of Australian birds. The Great Crested Grebe is found across most of Europe and central Asia, though it also winters in parts of doc science internal series 34 - CORE: Connecting Repositories Water flows on Cooper Creek in arid Australia. - South West NRM The taxonomy and species of birds of Australia and its territories May 6, 2008.
